Please contact individual providers directly to learn about vaccine type available at their location if it is marked as unidentified.

Currently, there is a limited supply of vaccine being distributed throughout the San Antonio and Bexar County area. As manufacturing ramps up, more healthcare providers and pharmacies will have the vaccine available for administration.

DSHS announced all adults will be eligible to receive a COVID-19 vaccine in Texas beginning Monday, March 29. Most vaccines are authorized for people 18 years old and older; the FDA has authorized the Pfizer vaccine for use in people 16 and older.

Even after receiving a vaccine, people will need to take precautions like physical distancing and wearing a mask to help stop the spread of COVID-19 as more people get vaccinated and we learn more about the immunity produced by the vaccines.

This map is updated on a weekly basis weekly on Mondays by 5pm, based on DSHS and Federal allocations. At this time, all locations listed require vaccine appointments. Walk-ins will not be accepted.

Providers on the map have given consent to San Antonio Metro Health to be listed. This is not an exhaustive list of vaccine providers within Bexar County.
