

COVID-19 VACCINE

FREQUENTLY ASKED QUESTIONS

For the most up to date info scan the QR Code to visit our website.

OUR FIGHT AGAINST COVID-19 IS NOT OVER.
Let's continue to look out for each other.

Wear your mask

Social distance

Wash your hands

Get vaccinated

Why should I get the vaccine?

- All available COVID-19 vaccines prevent moderate cases of COVID-19 and are extremely effective at preventing more severe cases that can lead to hospitalization and death.
- The COVID-19 vaccine can help protect you by creating an immunity response in your body without you having to become sick with COVID-19.
- Getting vaccinated also might help protect people around you from COVID-19, especially those at increased risk of severe illness from COVID-19.

Who can get the vaccine?

The goal is for everyone to be able to easily get a COVID-19 vaccine as soon as more are available. Visit <https://www.dshs.state.tx.us/coronavirus/immunize/vaccine.aspx>

***If you are pregnant, it is recommended to check with your doctor first.**

You should allow 14 days (before or after) between your flu shot and the COVID-19 vaccine.

Do I need to show proof of citizenship?

No. You will not need to prove citizenship to get a vaccine and public health will never share your information with any immigration or law enforcement agencies.

If I already had COVID-19 do I still take the vaccine?

Yes, people may get vaccinated after recovering from their COVID-19 infection.
